

Year 1	Year 2	Year 3
<ul> <li>Pupils should be taught to:</li> <li>count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number</li> <li>count, read and write numbers to 100 in numerals, count in different multiples including ones, twos, fives and tens</li> <li>given a number, identify one more and one less</li> <li>identify and represent numbers using concrete objects and pictorial representations including the number line, and use the language of: equal to, more than, less than (fewer), most, least</li> <li>read and write numbers 1 to 20 in numerals and words</li> </ul>	<ul> <li>Pupils should be taught to:</li> <li>count in steps of 2, 3, and 5 from 0, and count in tens from any number, forward or backward</li> <li>recognise the value of each digit in a two digit number (tens, ones)</li> <li>identify, represent and estimate numbers using different representation, including the number line</li> <li>compare and order numbers from 0 up to 100; use &lt;, &gt; and = signs</li> <li>read and write numbers to at least 100 in numerals and in words</li> <li>use place value and number facts to solve problems</li> </ul>	finding 10 or 100 more than a given number

	Year 1	Year 2	Year 3
	Pupils should be taught to:	Pupils should be taught to:	Pupils should be taught to:
	<ul> <li>read, write and interpret mathematical statements involving addition (+), subtraction</li> </ul>	<ul> <li>solve simple one-step problems with addition and subtraction:</li> </ul>	<ul> <li>add and subtract numbers mentally, including:</li> </ul>
	(-), and equals (=) signs	using concrete objects and pictorial	◊ a three-digit number and ones
	<ul> <li>represent and use number bonds and related subtraction facts within 20</li> </ul>	representations, including those involving numbers, quantities and measures	◊ a three-digit number and tens
	add and subtract one-digit and two-digit	applying their increasing knowledge of mental	◊ a three-digit number and hundreds
	numbers to 20,including zero	and written methods	<ul> <li>add and subtract numbers with up to three digits, using formal written matheda of</li> </ul>
Б	and subtraction, using concrete objects and	<ul> <li>recall and use addition and subtraction facts to 20 fluently, and derive and use related</li> </ul>	digits, using formal written methods of columnar addition and subtraction
acti	pictorial representations, and missing number problems such as $7 = 0.9$	facts up to 100	<ul> <li>estimate the answer to a calculation and use inverse operations to check answers</li> </ul>
Addition and Subtraction	problems such as 7 –L - 9	<ul> <li>add and subtract numbers using concrete objects, pictorial representations, and mentally, including:</li> </ul>	<ul> <li>solve problems, including missing number problems, using number facts, place value,</li> </ul>
and		◊ a two-digit number and ones	and more complex addition and subtraction
tion		<ul> <li>◊ a two-digit number and tens</li> </ul>	
ddi		◊ two two-digit numbers	
4		◊ adding three one-digit numbers	
		<ul> <li>show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot</li> </ul>	
		<ul> <li>recognise and use the inverse relationship between addition and subtraction and use this to check calculations and missing number problems</li> </ul>	

	Year 1	Year 2	Year 3
Multiplication and Division	<ul> <li>Pupils should be taught to:</li> <li>solve one step problems involving multiplication and division, calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher</li> </ul>	<ul> <li>Pupils should be taught to:</li> <li>recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers</li> <li>calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (x), division (÷) and equals (=) signs</li> <li>show that multiplications of two numbers can be done in any order (commutative) and division of one number by another cannot</li> <li>solve problems involving multiplication and division, using materials arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts</li> </ul>	<ul> <li>Pupils should be taught to:</li> <li>recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables</li> <li>write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including two-digit numbers times one-digit numbers, using mental and progressing to formal written methods</li> <li>solve problems, including missing number problems, involving multiplication and division, including integer scaling problems and correspondence problems in which n objects are connected to m objects</li> </ul>

	Year 1	Year 2	Year 3
·	<ul> <li>Pupils should be taught to:</li> <li>recognise, find and name a half as one of two equal parts of an object, shape or quantity</li> <li>recognise, find and name a quarter as one of four equal parts of an object, shape or quantity</li> </ul>	<ul> <li>Pupils should be taught to:</li> <li>recognise, find name and write fractions <sup>1</sup>/<sub>3</sub>, <sup>1</sup>/<sub>4</sub>, <sup>2</sup>/<sub>4</sub>, and <sup>3</sup>/<sub>4</sub> of a length, shape, set of objects or quantity</li> <li>write simple fractions e.g. <sup>1</sup>/<sub>2</sub> of 6 = 3 and recognise the equivalent of two quarters and one half</li> </ul>	<ul> <li>Pupils should be taught to:</li> <li>count up and down in tenths; recognise that tenths arise from dividing an object into 10 equal parts and in dividing one-digit numbers or quantities by 10</li> <li>recognise, find and write fractions of a discrete set of objects; unit fractions and non-unit fractions with small denominators</li> <li>recognise and use fractions as numbers; unit fractions and non-unit fractions with small denominators</li> <li>recognise and show, using diagrams, equivalent fractions with small denominators</li> <li>add and subtract fractions with the same denominator within one whole (e.g. <sup>5</sup>/<sub>7</sub> + <sup>1</sup>/<sub>7</sub> = <sup>6</sup>/<sub>7</sub>)</li> <li>compare and order unit fractions with the same denominators</li> <li>solve problems that involve all of the above</li> </ul>

	Year 1	Year 2	Year 3
	Pupils should be taught to:	Pupils should be taught to:	Pupils should be taught to:
	• compare, describe and solve practical problems for:	choose and use appropriate standard units to     estimate and measure length/height in any	• measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity
	<ul> <li>lengths and heights (e.g. long/short, longer/ shorter, tall/short, double/half)</li> </ul>	direction (m/cm); mass (kg/g); temperature (°C); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales,	<ul><li>(I/mI)</li><li>measure the perimeter of simple 2-D shapes</li></ul>
	<ul> <li>◊ mass or weight (e.g. heavy/light, heavier than, lighter than)</li> </ul>	<ul><li>thermometers and measuring vessels</li><li>compare and order lengths, mass, volume/</li></ul>	• add and subtract amounts of money giving change, using both £ and p in practical
	<ul> <li>capacity/volume (e.g. full/empty, more than, less than, half, half full, quarter)</li> </ul>	capacity and record the results using <, > and =	<ul><li>contexts</li><li>tell and write the time from an analogue clock,</li></ul>
	◊ time (e.g. quicker, slower, earlier, later)	<ul> <li>recognise and use symbols for pounds (£) and pence (p); combine amounts to make a</li> </ul>	including using Roman numerals from 1 to X11, and 12 hour and 24 hour clocks
	• Measure and begin to record the following:	particular value	• estimate and read time to the nearest minute;
Measures	<ul> <li>◊ lengths and heights</li> <li>◊ mass/weight</li> </ul>	• find different combinations of coins that equal the same amounts of money	record and compare time in terms of seconds, minutes, hours and o'clock; use vocabulary such as am/pm, morning, afternoon, noon
Mea	◊ capacity and volume	<ul> <li>solve simple problems in a practical context involving addition and subtraction of money of</li> </ul>	and midnight
	◊ time (hours, minutes, seconds)	the same unit, including giving change	• know the number of seconds in a minute and the number of days in each month, year and
	<ul> <li>recognise and know the value of different denominations of coins and notes</li> </ul>	• compare and sequence intervals of time	leap year
	<ul> <li>sequence events in chronological order using language (e.g. before, after, next, first, today, tomorrow, morning, afternoon and evening)</li> </ul>	• tell and write time to five minutes, including quarter past/to the hour and draw the hands on a clock face to show these times	• compare durations of events, for example to calculate the time taken by particular events or tasks.
	• recognise and use the language relating to dates, including days of the week, weeks, months and years	<ul> <li>know the number of minutes in an hour and the number of hours in a day</li> </ul>	
	• tell the time to the hour and half past the hour and draw the hands on a clock face		

		Year 1	Year 2	Year 3
	ape	<ul> <li>Pupils should be taught to:</li> <li>recognise and name common 2-D and 3-D shapes, including:</li> <li>2-D shapes (e.g. rectangles (including squares), circles and triangles)</li> </ul>	<ul> <li>Pupils should be taught to:</li> <li>identify and describe the properties of 2-D shapes, including the number of sides and symmetry in a vertical line</li> <li>identify and describe the properties of 3-D</li> </ul>	<ul> <li>Pupils should be taught to:</li> <li>draw 2-D shapes and make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations; and describe them with increasing accuracy</li> </ul>
Geometry	Properties of Shape	<ul> <li>3-D shapes (e.g. cuboids (including cubes), pyramids and spheres)</li> </ul>	<ul> <li>Identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces</li> <li>identify 2-D shapes on the surface of 3-D shapes, for example a circle on a cylinder and a triangle on a pyramid</li> <li>compare and sort common 2-D and 3-D shapes and everyday objects</li> </ul>	<ul> <li>recognise angles as a property of shape and associate angles with turning</li> <li>identify right angles, recognise that two right angles make a half-turn, three make three-quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle</li> <li>Identify horizontal and vertical lines and pairs of perpendicular and parallel lines</li> </ul>
	Position, Direction, Motion	<ul> <li>describe position, directions and movements, including half, quarter and three-quarter turns</li> </ul>	<ul> <li>order and arrange combinations of mathematical objects in patterns</li> <li>use mathematical vocabulary to describe position, direction and movement, including distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise/anti-clockwise)</li> </ul>	
Ctatictico	Olaristico		<ul> <li>interpret and construct simple pictograms, tally charts, block diagrams and simple tables</li> <li>ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity</li> <li>ask and answer questions about totalling and compare categorical data</li> </ul>	<ul> <li>interpret and present data using bar charts, pictograms and tables</li> <li>solve one-step and two-step questions such as 'How many more?' and 'How many fewer?' using information presented in scaled bar charts and pictograms and tables</li> </ul>

	Year 4	Year 5	Year 6
	Pupils should be taught to:	Pupils should be taught to:	Pupils should be taught to:
	• count in multiples of 6, 7, 9, 25 and 100	• read, write, order and compare numbers to at	
	• find 1000 more or less than a given number	least 1 000 000 and determine the value of each digit	to 10 000 000 and determine the value of each digit
	<ul> <li>count backwards through zero to include negative numbers</li> </ul>	<ul> <li>count forwards or backwards in steps of powers of 10 for any given number up to</li> </ul>	• round any whole number to a required degree of accuracy
	<ul> <li>recognise the place value of each digit in a four-digit number (thousands, hundreds, tens and ence)</li> </ul>	<ul><li>1 000 000</li><li>interpret negative numbers in context, count</li></ul>	use negative numbers in context, and calculate intervals across zero
¢	<ul><li>and ones)</li><li>order and compare numbers beyond 1000</li></ul>	forwards and backwards with positive and negative whole numbers through zero	<ul> <li>solve number problems and practical problems that involve all of the above</li> </ul>
e Valu	<ul> <li>identify, represent and estimate numbers using different representations</li> </ul>	• round any number up to 1 000 000 to the nearest 10, 100, 1000, 10 000 and 100 000	
d Plac	<ul> <li>round any number to the nearest 10, 100 or 1000</li> </ul>	<ul> <li>solve number problems and practical problems that involve all of the above</li> </ul>	
Number and Place Value	<ul> <li>solve number and practical problems that involve all of the above and with increasingly large positive numbers</li> </ul>	<ul> <li>read Roman numerals to 1000 (M) and recognise years written in Roman numerals</li> </ul>	
Nu	<ul> <li>read Roman numerals to 100 (I to C) and understand how, over time, the numeral system changed to include the concept of zero and place value</li> </ul>		

Pupils should be taught to: <ul> <li>add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate</li> <li>estimate and use inverse operations to check answers to a calculation</li> <li>solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why</li> <li>solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why</li> </ul> <li>solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why</li> <li>solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why</li> <li>solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why</li>		Year 4	Year 5	Year 6
<ul> <li>answers to a calculation</li> <li>solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why</li> <li>increasingly large numbers</li> <li>use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy</li> </ul>		<ul> <li>add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate</li> </ul>	<ul> <li>add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)</li> </ul>	<ul> <li>solve addition and subtraction multi-step problems in contexts, deciding which</li> </ul>
	Addition and Subtraction	<ul> <li>estimate and use inverse operations to check answers to a calculation</li> <li>solve addition and subtraction two-step problems in contexts, deciding which</li> </ul>	<ul> <li>add and subtract numbers mentally with increasingly large numbers</li> <li>use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy</li> <li>solve addition and subtraction multi-step problems in contexts, deciding which</li> </ul>	

	Year 4	Year 5	Year 6
	Pupils should be taught to:	Pupils should be taught to:	Pupils should be taught to:
	<ul> <li>recall multiplication and division facts for multiplication tables up to 12 x 12</li> <li>use place value, known and derived facts to</li> </ul>	<ul> <li>identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers.</li> </ul>	<ul> <li>multiply multi-digit numbers up to 4 digits by a two-digit whole number using the efficient written method of long multiplication</li> </ul>
Multiplication and Division	<ul> <li>use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers</li> <li>recognise and use factor pairs and commutatively in mental calculations</li> <li>multiply two-digit and three-digit numbers by a one-digit number using formal written layout</li> <li>solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as which n objects are connected to m objects</li> </ul>	<ul> <li>know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers</li> <li>establish whether a number up to 100 is prime and recall prime numbers up to 19</li> <li>multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers</li> <li>multiply and divide numbers mentally drawing upon known facts</li> <li>divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context</li> <li>multiply and divide whole numbers and those Involving decimals by 10, 100 and 1000</li> <li>recognise and use square numbers and cube numbers, and the notations, (<sup>2</sup>) (<sup>3</sup>)</li> <li>solve problems involving multiplication and division including using their knowledge of factors and multiples, squares and cubes</li> <li>solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign</li> <li>solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates</li> </ul>	<ul> <li>divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context</li> <li>divide numbers up to 4 digits by a two-digit number using the formal written method of short division where appropriate, interpreting remainders according to context</li> <li>perform mental calculations, including with mixed operations and large numbers</li> <li>identify common factors, common multiples and prime numbers</li> <li>using their knowledge of the order of operations to carry out calculations involving the four operations</li> <li>solve problems involving addition, subtraction, multiplication and division</li> <li>use estimation to check answers to calculations and determine, in the context of a problem, levels of accuracy</li> </ul>

	Year 4	Year 5	Year 6
	Pupils should be taught to:	Pupils should be taught to:	Pupils should be taught to:
	• recognise and show, using diagrams, families of common equivalent fractions	• compare and order fractions whose denominators are all multiples of the same number	<ul> <li>use common factors to simplify fractions; use common multiples to express fractions in the same denomination</li> </ul>
	<ul> <li>count up and down in hundredths; recognise that hundredths arise when dividing an object by a hundred and dividing tenths by ten</li> </ul>	<ul> <li>identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths</li> </ul>	<ul> <li>compare and order fractions including fractions &gt;1</li> </ul>
Percentages)	<ul> <li>solve problems involving increasingly harder fractions to calculate quantities, including non</li> </ul>	<ul> <li>recognise mixed numbers and improper fractions and convert from one to the other and write mathematical statements &gt;1 as a mixed number</li> </ul>	<ul> <li>add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions</li> </ul>
ercen	-unit fractions where the answer is a whole number	<ul> <li>(e.g. <sup>2</sup>/<sub>5</sub> + <sup>4</sup>/<sub>5</sub> = <sup>6</sup>/<sub>5</sub> = 1 <sup>1</sup>/<sub>5</sub>)</li> <li>add and subtract fractions with the same denominator</li> </ul>	• multiply simple pairs of proper fractions, writing the answer in its simplest form (e.g. $\frac{1}{4} \times \frac{1}{2} = \frac{1}{8}$ )
and P	<ul> <li>add and subtract fractions with the same denominator</li> </ul>	<ul> <li>and denominators that are multiples of the same number</li> <li>multiply proper fractions and mixed numbers by whole</li> </ul>	• divide proper fractions by whole numbers (e.g. $1/_3 \div 2 = 1/_6$ )
Decimals	<ul> <li>recognise and write decimal equivalents of any number of tenths or hundredths</li> </ul>	<ul> <li>numbers, supported by materials and diagrams</li> <li>read and write decimal numbers as fractions (e.g. 0.71 = <sup>71</sup>/<sub>100</sub>)</li> </ul>	<ul> <li>associate a fraction with division and calculate decimal fraction equivalents (e.g. 0.375) for a simple fraction (e.g. <sup>3</sup>/<sub>8</sub>)</li> </ul>
ng De	• recognise and write decimal equivalents to ${}^{1}\!/_{4}$ ; ${}^{1}\!/_{2}$ , ${}^{3}\!/_{4}$	<ul> <li>recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents</li> </ul>	<ul> <li>identify the value of each digit in numbers given to three decimal places and multiply and divide</li> </ul>
cludi	• find the effect of dividing a one or two-digit number by 10 and 100, identifying the value	<ul> <li>round decimals with two decimal places to the nearest whole number and to one decimal place</li> </ul>	numbers by 10, 100 and 1000 giving answers up to three decimal places
Fractions (Including	of the digits in the answer as ones, tenths and hundredths	<ul> <li>read, write, order and compare numbers with up to 3 decimal places</li> </ul>	<ul> <li>multiply one-digit numbers with up to two decimal places by whole numbers</li> </ul>
actio	<ul> <li>round decimals with one decimal place to the nearest whole number</li> </ul>	solve problems involving numbers up to 3 decimal places	• use written division methods in cases where the answer has up to two decimal places
Ë	• compare numbers with the same number of decimal places up to two decimal places	<ul> <li>recognise the per cent symbol (%) and understand that per cent relates to 'number of parts per hundred', and write percentages as a fraction with denominator 100, and as a decimal</li> </ul>	• solve problems which require answers to be rounded to specified degrees of accuracy
	<ul> <li>solve simple measures and money problems involving fractions and decimals to two decimal places</li> </ul>	<ul> <li>solve problems which require knowing percentage and decimal equivalents of <sup>1</sup>/<sub>2</sub>, <sup>1</sup>/<sub>4</sub>, <sup>1</sup>/<sub>+</sub>, <sup>2</sup>/<sub>+</sub>, <sup>4</sup>/<sub>+</sub> and those fractions with a denominator of a multiple of 10 or 25</li> </ul>	<ul> <li>recall and use equivalences between simple fractions, decimals and percentages, including in different contexts</li> </ul>

	Year 4	Year 5	Year 6
			Pupils should be taught to:
rtion			<ul> <li>solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts</li> </ul>
Ratio and Proportion			<ul> <li>solve problems involving the calculation of percentages (e.g of measures, and such as 15% of 360) and the use of percentages for comparison</li> </ul>
Ratio a			<ul> <li>solve problems involving similar shapes where the scale factor is known or can be found</li> </ul>
			<ul> <li>solve problems involving unequal sharing and grouping using knowledge of fractions and multiples</li> </ul>
			Pupils should be taught to:
			use simple formulae
			generate and describe linear number     sequences
Algebra			<ul> <li>express missing number problems algebraically</li> </ul>
Aig			<ul> <li>find pairs of numbers that satisfy an equation with two unknowns</li> </ul>
			<ul> <li>enumerate possibilities of combinations of two variables</li> </ul>
	•		

		Year 4	Year 5	Year 6
Geometry continued	Position, Direction and Motion	<ul> <li>Pupils should be taught to:</li> <li>describe positions on a 2-D grid as coordinates in the first quadrant</li> <li>describe movement between positions as translations of a given unit to the left/right and up/down</li> <li>plot specified points and draw sides to complete a given polygon</li> </ul>	<ul> <li>Pupils should be taught to:</li> <li>identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed</li> </ul>	<ul> <li>Pupils should be taught to:</li> <li>describe positions on the full coordinate grid (all four quadrants)</li> <li>draw and translate simple shapes on the coordinate plane, and reflect them in the axes</li> </ul>
	Statistics	<ul> <li>Pupils should be taught to:</li> <li>interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time graphs</li> <li>solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs</li> </ul>	<ul> <li>Pupils should be taught to:</li> <li>solve comparison, sum and difference problems using information presented in a line graph</li> <li>complete, read and interpret information in tables, including timetables</li> </ul>	<ul> <li>Pupils should be taught to:</li> <li>interpret and construct pie charts and line graphs and use these to solve problems</li> <li>calculate and interpret the mean as an average</li> </ul>
